/Summary

Born in Argentina, bachelor's degree in Information System Engineering, I'm passionate about working in the IT industry. Before ending my grade studies I had already started to work in the SW industry. I have been in different projects with different technologies and roles, dedicating the most of my time to web projects and other times touching other technologies and frameworks when it was needed. I believe in continuous learning to keep updated about the new technologies, how to use them and when they are truly needed.

/Professional skills

Web and Mobile

- Symfony (v3,v4,v5,v6)
- Laravel
- Doctrine
- Memcached
- Redis
- PHP
- Unit Testing (PHPSpect, Behat)
- API PLATFORM
- Python
- Django
- HTML5
- Javascript
- VUE
- ReactJs
- NodeJs
- Flutter
- Android Studio

DDBB

- MYSQL
- SQLSERVER
- PostgreSQL

Others

- Jenkins
- Docker
- Linux

ML

- Deep Learning
- Basics Machine Learning methodologies and algorithms
- Jupyter Notebook
- Google Cloud APIs and tools (Tensorflow, Translator, Analyst, Firebase)

Methodologies

- Agile Methodologies - SCRUM
- Kanvan
- Design patterns
- Git workflow

/Languages

- Spanish (native)
- English (fluent, level B2)
- Portuguese (read and understand)

/Soft skills

- Big picture vision
- Teamwork
- Creativity
- Problem Solving
- Brainstorming
- Detail oriented
- Tasks prioritization

Aranda, Pablo Damián

(Senior Software Developer)

/Work experience

Fullstack developer

2018-2021

ECOM <http://ecom.com.ar/es/>

This was my first approach into the sw development industry, while I was finishing my degree studies. I was a backend developer most of the time, other times I also was responsible to collect the client's requirements and analyze them to design the use cases. I was also responsible of the maintenance of different web projects in a variety of frameworks and versions.

Modality: Presential, remote.

Fullstack developer

2021-2022

WETAK <https://www.wetak.com/>

I was member of a multi-disciplinary team, formed by designers, requirement analysts, technical and project leaders. My main task was to develop and maintain a software product that evolve into different versions following a main path. I was responsible of the deployment of different environments, and the server administrations in which the projects were running. The main project was an e-learning platform provided to companies that need an efficient solution to the formation of their employees.

Modality: Remote.

/Courses and Certifications

2022

dBDD & BehatBDD & Behat Certification

PHPUnit: Testing with a BitePHPUnit: Testing with a Bite

JS Powerlifter (ReactJS!)

Harmonious Development with Symfony 6

Upgrading & What's New in Symfony 6!
